Food Chains - Dolphins

All life in the ocean is connected, dependant on each other and together form a healthy ecosystem. Use the images below to create a dolphin food chain and see how all these species are connected. Identify which are producers, predators, prey, decomposers, carnivores, or herbivores.

		
ORCA	DOLPHINS	JELLYFISH
		
TIGER SHARK	SHRIMP	CRAB
		
FISH	SEA TURTLE	TUNA
		
OCTOPUS	GIANT KELP	SEA GRASS
